

# LEON

## MID TO SENIOR FULL-STACK DEVELOPER

# SHABANI

A full-stack developer who enjoys building clean and reliable web applications. Experienced with Next.js, Firebase, and many other tools and languages adapted to the needs of each project I've built. Comfortable taking projects from an idea to a working product. I've worked on different web projects and enjoy solving problems, improving user experience, and making things look and feel smooth. Right now, I'm creating my first SaaS platform, **Rezzervo** — helping businesses book smarter, not harder.

### Experience

#### Wādi Taxi GmbH

Jan 2025 – Present

- Built a taxi & limo booking website from scratch, with UI/UX design, booking flow, and an admin dashboard for managing rides, customers, and company operations.

#### Nürnberg IceTigers

Jun 2024 – Jan 2025

- Redesigned and rebuilt the website using modern tech for better speed and SEO, adding Strapi CMS integration so the client can update content themselves.

#### Kiwi LMS

Feb 2024 – Jul 2024

- Contributed to a restaurant employee training platform, implementing new features and handling most of the frontend development.

#### ATS Consulting LLC

Dec 2023 – Jul 2024

- Developed the website with WordPress and Elementor, resulting in a smooth project and a great working experience with the team.

#### Future Minds Academy

Jul 2023 – Jul 2024

- Served as a course instructor, teaching frontend fundamentals to a great group of students using HTML, CSS, Tailwind CSS, and Bootstrap.
